

## RANK + RENT SITE SUPPORTING TEXT

---

I'll admit that the theme I provided can be designed a bit better, but the thing that matters is that it works ☺

The goal is simple:

More income for you to earn on the side.

As you go through the theme yourself, you'll get a better idea of how it actually works.

You'll notice that there's a page for each city at the top right (remember, this example is in the South African market). This can show the potential. Think about how many cities there are in each state you target.

The quote will be emailed directly to you and then you can forward it on to the company you've partnered with.

It's a numbers game here. The more sites you have, the more will work out and rank well on Google which results in client partnerships and more income.

MOST of the sites won't rank the way you thought it would have. Just accept this fact.

Eventually you'll have a few sites that do really well and you'll even neglect some of the sites that you thought did well, but in comparison to others, it's not worth the effort anymore to keep updating and promoting.

If you REALLY focus on this, you can realistically earn \$1,000 - \$2,000pm. Many people earn \$5,000+ with this strategy.

Create these websites, focus on key SEO terms, improve your systems along the way and eventually it will start paying off.

PS – don't limit yourself in choosing a country/state. This strategy works incredibly well in the US, Canada, UK, Australia, Europe, Singapore, Indonesia, South Africa, New Zealand, ~~Antarctica~~.
